

## **AUDIT MicroControls, Inc. Launches New Website**

**January 23, 2012 (CARLSBAD, CA)**, AUDIT MicroControls, Inc. is pleased to announce the launch of [auditmicro.com](http://auditmicro.com), a one-stop-solution for laboratories' quality control and calibration verification/linearity needs. Due to an increasing amount of visitors, Audit MicroControls decided it was time to revamp the website to make it more user friendly for the customer.

To live up to expectations of the customers and laboratory managers this one-stop-website offers information about quality control products, calibration verification/ linearity products, AUDITOR™ QC, AUDIT® Ship and AUDIT® Consulting Services.

AUDIT MicroControls' routine and esoteric quality control chemistry product line includes MicroFD BNP, the only commercially available control that can be used with all BNP-32 and NT-proBNP assays, and MicroFD glycohemoglobin A1c. AUDIT MicroCV Calibration Verification/Linearity System is the most complete line of calibration verification material designed to assist with CLIA-88 revalidation. The extensive lineup of cal ver products include: general chemistry, immunoassay, glycohemoglobin A1c, BNP linearity sets, and more.

AUDIT MicroControls provides a free data reduction program to their customers, called AUDITOR™ QC. This service is a group of Internet based tools that perform statistical analysis calculations on the QC data supplied by the lab and provides the end user with Levy-Jennings that may be printed or stored for future use.

AUDIT® SHIP is a delivery system that guarantees the lab will receive purchased products according to the laboratory manager's schedule, not theirs. Simply tell them when, and how often, you need your products shipped, and let AUDIT SHIP take care of the details.

AUDIT® Consulting Services provides Calibration Verification/Linearity and Daily Quality Control Summary Reports to laboratories for the purpose of qualifying data performed according to CLIA guidelines.

The combination of the new images and user friendly pages makes [auditmicro.com](http://auditmicro.com) the first choice for customers and lab managers to search and find calibration verification/linearity products and routine chemistry quality controls.

### About AUDIT MicroControls

Founded in 2002, AUDIT MicroControls is a wholly owned subsidiary of Aalto Scientific, Ltd. of Carlsbad, CA. Specializing in calibration verification/linearity products, and routine and esoteric chemistry quality controls, AUDIT products are available through a number of regional and national distributors. For more information about AUDIT, please call (866) 25-AUDIT or visit [www.auditmicro.com](http://www.auditmicro.com).
